STUDY GUIDE

The Chicago Guide to Writing about Multivariate Analysis

JANE E. MILLER

The University of Chicago Press
Chicago & London
## CONTENTS

**Title Page and Table of Contents**  ii  
**Preface**  v  

**Chapter 1**  Introduction  
SUGGESTED COURSE EXTENSIONS  1  

**Chapter 2**  Seven Basic Principles  
PROBLEM SET  2  
SUGGESTED COURSE EXTENSIONS  5  
SOLUTIONS  7  

**Chapter 3**  Causality, Statistical Significance, and Substantive Significance  
PROBLEM SET  8  
SUGGESTED COURSE EXTENSIONS  11  
SOLUTIONS  13  

**Chapter 4**  Five More Technical Principles  
PROBLEM SET  15  
SUGGESTED COURSE EXTENSIONS  19  
SOLUTIONS  21  

**Chapter 5**  Creating Effective Tables  
PROBLEM SET  23  
SUGGESTED COURSE EXTENSIONS  27  
SOLUTIONS  29  

**Chapter 6**  Creating Effective Charts  
PROBLEM SET  32  
SUGGESTED COURSE EXTENSIONS  37  
SOLUTIONS  39  

**Chapter 7**  Choosing Effective Examples and Analogies  
PROBLEM SET  43  
SUGGESTED COURSE EXTENSIONS  45  
SOLUTIONS  48  

**Chapter 8**  Basic Types of Quantitative Comparisons  
PROBLEM SET  49  
SUGGESTED COURSE EXTENSIONS  53  
SOLUTIONS  55
Chapter 9  Quantitative Comparisons for Multivariate Models
  PROBLEM SET  57
  SUGGESTED COURSE EXTENSIONS  64
  SOLUTIONS  68

Chapter 10  Choosing How to Present Statistical Results
  PROBLEM SET  72
  SUGGESTED COURSE EXTENSIONS  76
  SOLUTIONS  80

Chapter 11  Writing Introductions, Conclusions, and Abstracts
  PROBLEM SET  84
  SUGGESTED COURSE EXTENSIONS  86
  SOLUTIONS  88

Chapter 12  Writing about Data and Methods
  PROBLEM SET  90
  SUGGESTED COURSE EXTENSIONS  93
  SOLUTIONS  96

Chapter 13  Writing about Distributions and Associations
  PROBLEM SET  97
  SUGGESTED COURSE EXTENSIONS  98
  SOLUTIONS  100

Chapter 14  Writing about Multivariate Models
  PROBLEM SET  102
  SUGGESTED COURSE EXTENSIONS  108
  SOLUTIONS  110

Chapter 15  Speaking about Numbers
  PROBLEM SET  113
  SUGGESTED COURSE EXTENSIONS  115
  SOLUTIONS  116

Chapter 16  Writing for Applied Audiences
  PROBLEM SET  126
  SUGGESTED COURSE EXTENSIONS  127
  SOLUTIONS  130
This study guide was designed to provide practice applying the principles and tools introduced in *The Chicago Guide to Writing about Multivariate Analysis*, with a problem set and a series of suggested course extensions for each chapter.

The problem sets reinforce the concepts and skills from each chapter, usually working with data or written examples provided as part of the question. Some require calculations, others involve creating or critiquing tables, charts, or sentences. They can be used as homework assignments for courses on regression analysis, research methods, or research writing, or independently by readers who are trained in regression methods. Solutions for the odd-numbered problems can be downloaded separately.

The suggested course extensions apply the skills and concepts from *Writing about Multivariate Analysis* to the actual writing process. They involve reviewing existing work, applying statistics, writing, and revising—using either your own work in progress or published materials (books, articles, reports, or Web pages) in your field or that of your intended audience.

The “applying statistics” questions require access to a computerized database that includes several nominal, ordinal, and interval or ratio variables for at least several hundred cases. Ideally these variables should be related to a research question involving application of multivariate regression that you can use for the exercises throughout the study guide, yielding a comprehensive analysis for a complete research paper. These exercises also require access to the accompanying documentation describing the study design, data collection, coding, use of sampling weights, and related methodological issues for the data set from which your variables are taken. If you do not have a data set and documentation that fits these criteria, you can often find them on CD-ROMS that accompany research methods or statistics textbooks, or you can download them from sites such as the Inter-University Consortium for Political and Social Research (ICPSR).

Many of the suggested exercises for writing or revision entail peer-editing. They are most effective if done with one or more other people, whether as part of a course in which class time is devoted to these exercises, or working with a colleague. These exercises often involve writing or revising work to meet the instructions for authors for a leading journal in your field. Identify one or two such journals before you begin these tasks, allowing you to generate a coherent finished product for submission to that journal.
