How Politics Became Our Identity
Lilliana Mason

“Highly recommended. . . . In describing American politics today, Mason argues that partisan identity (Democrat or Republican) has become a ‘mega-identity’ because it increasingly combines a number of different identities. . . . And which party people belong to is important because there is some evidence that instead of people choosing their party affiliation based on their political views (and changing parties if their views are no longer represented by that party), they shift their views to align with their party identity.”—538

From Politics to the Pews
How Partisanship and the Political Environment Shape Religious Identity
Michele F. Margolis

“Margolis’s work helps explain the emergence and staying power of the mutually reinforcing relationship between Republicanism and conservative Christianity.”—Washington Monthly

“There are no other books like From Politics to the Pews, with its original and persuasive argument that the relationship between political partisanship and religious identity is a reciprocal one. Margolis has added much to the research on partisan conflict and polarization.”—Robert Y. Shapiro, Columbia University

The Increasingly United States
How and Why American Political Behavior Nationalized
Daniel J. Hopkins

“Hopkins takes an empirical hammer to shatter the outdated maxim ‘all politics is local.’ Instead, he persuasively illustrates that politics in the United States have become increasingly nationalized, and that this is crucial to other major trends in American politics, such as the rise in partisan polarization. This is an authoritative book on an overlooked but essential topic.”

—Nate Silver, founder and editor, 538

“An extremely important piece of work. . . . There are at least half a million elected officials in the United States. Only 537 of them are federal. And yet almost all of our collective attention is on those federal officials and in particular, just one of them: the president. . . . This disconcerting disconnect between national political behavior and localized elections is the subject of The Increasingly United States.”—Vox

Enchanted America
How Intuition and Reason Divide Our Politics
J. Eric Oliver and Thomas J. Wood

“This may well be the single most important book on public opinion in the last quarter century. The authors challenge our fundamental understanding of how individuals form opinions and engage in politics. It will surely stimulate debates for a generation, while at the same time dramatically enhancing what we know about citizens.”—James N. Druckman, Northwestern University

How to Save a Constitutional Democracy
Tom Ginsburg and Aziz Z. Huq

“Drawing expertly on examples from across the world, Ginsburg and Huq highlight the constitutional mechanisms by which democracies may be undermined—often by elected leaders themselves—in the contemporary era. . . . whereas other recent books on the crisis of American democracy focus on what has gone wrong, Ginsburg and Huq provide us with clear-eyed proposals—including some bold constitutional reforms—for how to fix it. I strongly recommend this book.”—Steven Levitsky, coauthor of How Democracies Die

Billionaires and Stealth Politics
Benjamin I. Page, Jason Seawright, and Matthew J. Lacombe

Page, Seawright, and Lacombe argue that while political contributions offer a window onto billionaires’ influence, they do not present a full picture of policy preferences and political actions. That is because on some of the most important issues, including taxation, immigration, and Social Security, billionaires have chosen to engage in “stealth politics.” Stealth politics makes it difficult for ordinary citizens to know what billionaires are doing or mobilize against it.

America, Compromised
Lawrence Lessig

Lawrence Lessig provides a sweeping indictment of contemporary American institutions and the corruption that besets them—from the selling of Congress to special interests to the corporate capture of the academy. Through case studies of Congress, finance, the academy, the media, and the law, Lessig shows how institutions are drawn away from higher purposes and toward money, power, quick rewards—the first steps to corruption.

The Politics of Petulance
America in an Age of Immaturity
Alan Wolfe

“Wisdom is rare, political wisdom more so. Writing with characteristic lucidity and deep care for democracy’s future, Alan Wolfe’s mobilization of intellectual heroes and acute observations about popular suspicion and populist politics, narcissistic leadership and irresponsible simplification, offers an uncommon exception. By instructing and inspiring, this book’s quest for democratic maturity will stimulate rich conversation about knowledge and responsibility, not only within the academy but well beyond.”—Ira Katznelson, author of Fear Itself

The Structure of Policy Change
Derek A. Epp
“In this wonderful book, Epp argues that issues matter. Some issues are inherently more complex than others and therefore will be processed differently by decision-making bodies.”—Christian Breunig, University of Konstanz

“Epp makes a valuable contribution to policy theory, making the compelling case that stability is in and of itself an important goal within the broader desire of policy theorists to understand basic questions of policy change. His discussion also extends to explore the implications for institutional design.”—Chris Koski, Reed College

State Constitutional Politics
Governing by Amendment in the American States
John Dinan

Rivalry and Reform
Presidents, Social Movements, and the Transformation of American Politics
Sidney M. Milkis and Daniel J. Tichenor
“In their timely and deeply illuminating book, Milkis and Tichenor examine the ‘uneasy partnerships’ between presidents and social movements, which have transformed the nation during key junctures in American history. Rivalry and Reform makes a critical intervention in the debate about ‘top down’ versus ‘bottom up’ social change. A wonderful and important book, backed by very important and cutting-edge research. I will recommend it widely.”—Jeffrey D. Sachs, Columbia University

Why Parties Matter
Political Competition and Democracy in the American South
John H. Aldrich and John D. Griffin

Welcoming New Americans?
Local Governments and Immigrant Incorporation
Abigail Fisher Williamson
“Williamson puts forth an interesting and counterintuitive line of argument: local elected officials are professionally motivated to respond positively to immigrants, but this positive response can incite public opinion in a negative direction toward immigrants. In this dynamic, she highlights the central role of the politics of framing immigrants either as worthy individuals working hard at jobs nobody wants or as undeserving newcomers who are getting special advantages and taking jobs away from locals.”—John Mollenkopf, Graduate Center, CUNY

Legacies of Losing in American Politics

Jeffrey K. Tulis and Nicole Mellow

“Tulis and Mellow make a huge leap forward, provocatively contending that the very ideas, tactics, and coalitions that met with thundering defeats in the nation’s most critical junctures have provided the means for the resurgence of their causes. A World of Homeowners: American Power and the Politics of Housing Aid
Nancy H. Kwak

“[A] fascinating and urgent history of American international housing assistance programs in the post–World War II era. Kwak charts how the American housing programs operated as an extension of American power. While historians have long known about the economic and ideological power of homeownership programs in the U.S., Kwak demonstrates that support for homeownership abroad was a central part of postwar American international aid programs.”—American Historical Review

Populism Left and Right
Éric Fassin
Translated by Éric Fassin

In Populism Left and Right, Éric Fassin cautions against the promise that populism seems to hold for a more egalitarian future. Rather, Fassin warns that attempts to transform right-wing resentment of migrants and minorities into leftist rage against economic elites will just not work. In this lively sociological and political commentary, Fassin argues that replacing the opposition between right and left by that between the people and the elites only feeds democratic despair.

We Have Not a Government
The Articles of Confederation and the Road to the Constitution
George William Van Cleve

“We Have Not a Government provides a focused explanation of the reasons the Articles of Confederation, the nation’s first federal constitution, went lurching toward collapse. . . . Van Cleve patiently examines the specific matters of public policy that vexed national politics in the mid-1780s. . . . What Van Cleve does demonstrate, persuasively, is that the genuine crisis of the Confederation required creating a “ staggeringly powerful” national government through a “grand bargain” that went well beyond what any state might have asked for itself.”—The Washington Post

Time to Save Democracy
How to Govern Ourselves in the Age of Anti-Politics
Henry Tam
With clear, accessible prose, Henry Tam sets out to explore what exactly should be done to revive democracy. Moving beyond familiar ‘get the vote out’-style ideas, Tam sets out nine key areas where reforms are necessary to ensure we can govern ourselves more effectively, touching on notions of having a shared mission and mutual respect among politically dissimilar groups, the importance of public accountability for elected officials, and sustaining the power balance between the government and its constituents. Dispelling the suggestion that democracy has run its course, this book serves as a powerful reminder of why democratic governance is indispensable.

German social and economic philosophers Michael Brie and Claus Thomasberger bring together central figures in the field—including Gareth Dale, Nancy Fraser, and Kari Polanyi Levitt—to provide an essential anthology on the contemporary importance of Polanyi’s thought. This book is centered around Polanyi’s ideas on freedom and community in a complex socialist society based on a completely transformed economy. They Thought They Were Free
The Germans, 1933–45
Milton Mayer
With a New Afterword by Sir Richard J. Evans
Mayer, an American journalist of German descent, traveled to Germany in 1935, and sought to talk with the average German citizen about the rise in Nazism. He found ten, and his discussions with them of Nazism, the rise of the Reich, and mass complicity with evil became the backbone of this book. A new foreword to this edition by eminent historian of the Reich Richard J. Evans puts the book in historical and contemporary context.

Arendt and America

“King’s great contribution to the literature on Arendt is to show, in fine-grained terms, how her political theory was the result of a quintessentially American experience: to arrive on American shores an immigrant, to draw on resources from both an old country and a new, imagined one, and to participate in the riot of reinvention.”—Los Angeles Review of Books
“‘This book offers a detailed history of Arendt’s intellectual milieu in the United States, moving between her published writings, reviews and correspondence with her key interlocutors. . . . The Socratic Way of Life

Xenophon’s “Memorabilia”
Thomas L. Pangle

“Pangle’s work on Xenophon’s Memorabilia is, quite simply, magisterial. His interpretation builds on scant existing scholarship, bringing Xenophon’s work into a much wider frame of scholarly reference. The Socratic Way of Life sheds new light on the long-standing dispute concerning the authentic teaching of the historical Socrates as distinct from the Socrates portrayed in Plato’s dialogues. This could have little short of revolutionary implications for the study of classical philosophy.”—Carnes Lord, US Naval War College

Becoming Political

Spinoza’s Vital Republicanism and the Democratic Power of Judgment
Christopher Skeaff

“Spinoza has never been ‘fashionable,’ but over the past decade there has unquestionably been an important renewed interest in the relevance of his work for contemporary theory and politics. Any reader interested in (re)discovering Spinoza should start with Christopher Skeaff’s erudite yet supple Becoming Political, a book that not only offers a fresh interpretation of Spinoza as a ‘vital republican’ but also mobilizes that reading to engage rigorously and meaningfully with a variety of strands of contemporary political theory.”—Samuel A. Chambers, Johns Hopkins University

Poetic Justice

Rereading Plato’s “Republic”
Jill Frank

With Poetic Justice, Jill Frank overturned the conventional view that the Republic endorses a hierarchical ascent to knowledge and the authoritarian politics associated with that philosophy. When learning to read is understood as the passive absorption of a teacher’s beliefs, this reflects the account of Platonic philosophy as authoritative knowledge wielded by philosopher kings who ruled the ideal city. When we learn to read by way of the method Socrates introduces in the Republic, Frank argues, we are offered an education in ethical and political self-governance, one that prompts citizens to challenge all claims to authority, including those of philosophy.

Creating Political Presence
The New Politics of Democratic Representation
Edited by Dario Castiglione and Johannes Pollak
In Creating Political Presence, a diverse and international group of scholars explores the implications of democratic representation today. In the first section, the contributions investigate how political representation relates to empowerment. Contributions in the second section look at representation from the perspective of inclusion. The final section examines political representation from a more systemic perspective, exploring its broader environmental conditions and the way it acquires democratic legitimacy.

Clashing over Commerce
* A History of US Trade Policy
Douglas A. Irwin

“This is, without a doubt, the most comprehensive discussion of trade policy since Taussig’s immensely influential *Tariff History of the United States*. Irwin describes the profound evolution of American trade policy from colonial times to the present, bringing up to date with the most recent empirical research and the emergence of a broader trade policy. In its breadth and depth, *Clashing over Commerce* represents a major contribution.”—Jeremy Atack, Vanderbilt University

Deirdre N. McCloskey

“It is a giant of a book about a giant of a topic: the ‘great enrichment’ of humanity over the past 300 years. It is so rich in vocabulary, allusion and fact as to be a contender for the great book of our age. Dump your copy of Thomas Piketty and put Deirdre McCloskey on the bookshelf instead.”—*The Times, Book of the Week*

“It will join its companion volumes as essential reading on the industrial revolution, as well as a model of the intellectual depth and breadth achievable through the study of economics.”—*Financial Times*

Marx’s Dream
* From Capitalism to Communism
Tom Rockmore

With *Marx’s Dream*, Rockmore breaks with the Marxist view of Marx in three ways: by showing that the concern with the relation of theory to practice arose as early as Socrates, and has been central to philosophy in its best moments; by seeking to free Marx from his unsolicited Marxist embrace in order to consider his theory on its own merits; and by relying on the normal standards of philosophical debate.

Currency Statecraft
Monetary Rivalry and Geopolitical Ambition
Benjamin J. Cohen
In a comprehensive review that ranges from World War II to the present, Benjamin J. Cohen convincingly argues that one goal stands out as the primary motivation for currency statecraft: the extent of a country’s geopolitical ambition, or how driven it is to build or sustain a prominent place in the international community. Cohen describes how China has vigorously promoted the international standing of its currency in recent years, even at the risk of exacerbating relations with the United States, and explains how the outcome could play a major role in shaping the broader geopolitical engagement between the two superpowers.

With clearly written explanations of complex arguments, their book will be a valuable addition to both fields and to practitioners engaged in democracy promotion, especially those who work for or with international organizations.”—Yoram Haftel, The Hebrew University of Jerusalem

Edited by Timothy Brook, Michael van Walt van Praag, Miek Boltjes

“Sacred Mandates achieves a fundamental and sweeping revision to how we think about nation-states and nationalism. The scholarship is cutting-edge, and the contributors are all established scholars—the leaders in their fields and subfields. Nowhere else can readers find such impressive scholarship on the deep historical roots of Inner and East Asian international relations in one volume, let alone one that is well written and clearly organized like this.”—James Carter, St. Joseph’s University

The Defence of Constitutionalism
Or the Czech Question in Post-National Europe
Jirí Pribán
Translated by Stuart Hoskins

Czech politics has become a pragmatic question of democratic constitutionalism and civility. Originally published in major Czech newspapers, these essays on contemporary European politics demonstrate that this new understanding involves both technical questions of power making and critical questions of its meaning. Democracy, Pribán shows, is the process of permanent self-correction.

The Political Thought of Abdullah Öcalan
Kurdistan, Women’s Revolution and Democratic Confederalism
Abdullah Öcalan

Abdullah Öcalan actively led the Kurdish liberation struggle as the head of the PKK from its foundation in 1978 until his abduction on February 15, 1999. Now, writing from isolation in Turkey’s Imrali Island Prison, he has shaped a new political movement in the Middle East called Democratic Confederalism. Bringing together Öcalan’s ideas in one slim volume for the first time, The Political Thought of Abdullah Öcalan contains a selection of his most influential writings over his lifetime.

Kill It to Save It
An Autopsy of Capitalism’s Triumph over Democracy
Corey Dolgon
“This book is a trenchant critique of a popular notion in today’s politics and policy making: kill it to save it, the notion that often ‘the only way to save public institutions is to privatize them.’ . . . Dolgon paints a sad picture of such vaunted American public institutions as social security, public education, health care, food, voting rights, and campaign finance, among others, and argues that the kill-it-to-save-it ideology is to blame. . . . Kill It to Save It is engagingly written and persuades the reader of the need to save our public institutions by investing in them, not by killing them. Recommended.”—Choice

Nathan Lean
Situating Islamophobia within a long history of national and international fears, The Islamophobia Industry challenges the illogical narrative of hate that dominated discussions about Muslims and Islam for too long. Islam and the Rule of Justice
Image and Reality in Muslim Law and Culture
Lawrence Rosen
Drawing on specific cases, Rosen explores the application of Islamic law to the treatment of women (who win most of their cases), the relations between Muslims and Jews (which frequently involve close personal and financial ties), and the structure of widespread corruption (which played a key role in prompting the Arab Spring). From these case studies he explains the role of informal mechanisms in the resolution of local disputes. The author also provides a close reading of the trial of Zacarias Moussaoui, who was charged in an American court with helping to carry out the 9/11 attacks, using insights into how Islamic justice works to explain the defendant’s actions during the trial.

Islands of Sovereignty
Haitian Migration and the Borders of Empire
Jeffrey S. Kahn
Islands of Sovereignty is the first book to examine the history of the Caribbean maritime border and how it emerged from decades of litigation struggles over the treatment of Haitian asylum seekers in the United States. Jeffrey S. Kahn explores how a series of skirmishes in the South Florida offices of the US immigration bureaucracy became something much more—a fight for the soul of immigration policing in the United States that would eventually remake the asylum adjudication landscape on a global scale.

Confident Pluralism
Surviving and Thriving through Deep Difference
John D. Inazu
With a New Preface
“Inazu offers an important new consideration of the value of pluralism for American democratic society. Confident pluralism, Inazu explains, is a political solution to the problem of deep and pervasive differences in the electorate. It recognizes difference and even invites it while acknowledging the need for consensus and unity in political life. The end goal of confident pluralism is not to resolve all issues but to allow individuals to function despite their differences. Highly Recommended.”—Choice

The Sit-Ins
Protest and Legal Change in the Civil Rights Era
Christopher W. Schmidt
“Schmidt has written the definitive legal treatment of the sit-in movement of the 1960s. He masterfully weaves together the social, political, and legal history of the transformative protests of the brave African American college students who challenged Jim Crow. Schmidt is unafraid to look at the messiness of the law—the confusions, gaps, and inconsistencies that most scholars try to neaten up. There is conflict here, and that conflict is deeply illuminating. The Sit-Ins tells a fascinating story that adds much to our understanding of the relationship between law and social movements, the role of popular constitutionalism outside the courts, and the meaning of the Constitution itself.”—Risa L. **Lawsuits in a Market Economy**  
*The Evolution of Civil Litigation*  
Stephen C. Yeazell  
“Lawsuits in a Market Economy aims to understand civil litigation in the United States from a ‘10,000 foot view,’ comparing it to the past and thinking about what it will look like in the future. Unlike many ‘10,000-foot view’ books, however, it is extraordinarily well-grounded: Yeazell has an unparalleled knowledge of civil litigation and a true commitment to providing empirical support for arguments, including historic trends. The book is a beautifully written, eminently readable, and important contribution to the literature on civil litigation.” —William B. Rubenstein, Harvard Law School

Thinking Through Statistics
John Levi Martin

Thinking Through Statistics is a primer on how to maintain rigorous data standards in social science work, and one that makes a strong case for revising the way that we try to use statistics to support our theories. With clever examples and witty takeaways, John Levi Martin proves himself to be a most affable tour guide through these scholarly waters. Martin argues that the task of social statistics isn’t to estimate parameters, but to reject false theory. He illustrates common pitfalls that can keep researchers from doing just that using a combination of visualizations, re-analyses, and simulations.

Reclaiming Fair Use
How to Put Balance Back in Copyright, Second Edition

Taking stock of the vibrant remix culture that has only burgeoned since the book’s original publication, this new edition addresses the expanded reach of fair use—tracking the Twitter hashtag #WTFU (where’s the fair use?), the maturing of the transformativeness measure in legal disputes, the ongoing fight against automatic detection software, and the progress and delays of digitization initiatives around the country.
