Who Wants to Run?
How the Devaluing of Political Office Drives Polarization

Andrew B. Hall

In Who Wants To Run?, Andrew B. Hall suggests that the increasing reluctance of moderate citizens to run for office is contributing to the ideological gulf between Democrats and Republicans in today’s American politics. Hall argues that our political system discourages moderate candidates from seeking office in the first place. To understand what is wrong with our legislatures, then, we need to ask ourselves the question: who wants to run? If we want more moderate legislators, we need to make them a better job offer.

Billionaires and Stealth Politics

Benjamin I. Page, Jason Seawright, and Matthew J. Lacombe

“Incredibly important. The authors provide—for the first time—a clear sense of the politics and political activity of the top one hundred billionaires in America, matching what billionaires have said with what they’ve done and showing the troubling transparency gap that is critical to the evolution of policy. Billionaires and Stealth Politics is a key addition to understanding our current political reality, focused on its most significant lever.”—Lawrence Lessig, author of America, Compromised

Presidents and Parties in the Public Mind

Gary C. Jacobson

With Presidents and Parties in the Public Mind, Gary C. Jacobson argues that the expansion of the executive branch in the twentieth century that gave presidents a greater role in national government also gave them an enlarged public presence, magnifying their role as the parties’ public voice and face. Jacobson concludes by looking at the most recent presidents’ effects on our growing partisan polarization, analyzing Obama’s contribution to this process and speculating about Trump’s potential for amplifying the widening demographic and cultural divide.

The Politics of Petulance
America in an Age of Immaturity
Alan Wolfe

“A withering broadside against the immaturity that infects American politics, revealing itself in populism and demagoguery. Both the left and the right take it on the chin in this tough-minded analysis by Wolfe. . . . This is a persuasive and alarming book.”—Kirkus

“[Wolfe’s] most important observation in this timely book is that Americans who waste their time disdaining Washington and blaming everyone else for Trumpism need once again to stop ignoring the better angels of our history and recognize the noble possibilities of politics.”—Susan Jacoby, author of The Age of American Unreason in a Culture of Lies

Conservative Innovators
How States Are Challenging Federal Power
Ben Merriman

Conservative Innovators traces the activity of far-right conservatives in Kansas who have in the past decade used the powers of state-level offices to fight federal regulation on a range of topics from gun control to voting processes to Medicaid. Ben Merriman then expands the scope of the book to look at the tactics used by conservative state governments across the country to resist federal regulations, underscoring the newly important role of state governments in today’s American political landscape.

Bending the Rules
Procedural Politicking in the Bureaucracy
Rachel Augustine Potter

With Bending the Rules, Rachel Augustine Potter shows that rulemaking is not the rote administrative activity it is commonly imagined to be but rather an intensely political activity in its own right. Tracing the rulemaking process from when an agency first begins working on a rule to when it completes that regulatory action, Potter shows how bureaucrats use procedures to resist interference from Congress, the President, and the courts at each stage of the process. This exercise reveals that unelected bureaucrats wield considerable influence over the direction of public policy in the United States.

Lilliana Mason

“This is the kind of research that will change not just how you think about the world but how you think about yourself.” —Vox

“Sobering. . . . Mason argues that factors such as class, race, religion, gender, and sexuality used to cut across one another to a significant extent. . . . In the past decades, though, ‘partisan, ideological, religious, and racial identities have moved into strong alignment. . . . A single vote can now indicate a person’s partisan preference as well as his or her religion, race, ethnicity, gender, neighborhood and favorite grocery store.” —New Yorker

Conspiracies of Conspiracies
How Delusions Have Overrun America
Thomas Milan Konda
“The theories Konda weighs and finds wanting are fascinating in their perversity, from chemtrails to climate change deniers. A book that deserves wide circulation and consideration.”—Kirkus

“Konda’s survey is perhaps the most comprehensive attempt yet to record and understand the phenomenon of conspiracy theory as it applies to American politics...[he] manages to give a clear picture of a subject that is more often obscured under a deluge of intensely partisan opinions.”—Fortean Times

America, Compromised
Lawrence Lessig
“America, Compromised is about the country in the Trump era, but not about Trump...[Lessig’s] focus is not on bad people doing bad things, but on how incentives across a range of institutions have created corruption, with deleterious consequences for the nation.”—New York Times Book Review

“Lessig lays out a working definition and theory of corruption that is at once simple and comprehensive, a devastating argument that America is racing for the cliff’s edge of structural, possibly irreversible tyranny.”—Cory Doctorow

Berlin Family Lectures

Rivalry and Reform
Presidents, Social Movements, and the Transformation of American Politics
Sidney M. Milkis and Daniel J. Tichenor
Beginning in the late 1950s and continuing through the 1970s, the federal government extended its scope into policy arenas previously left to civil society or state and local governments. The Great Broadening examines in detail the causes, internal dynamics, and consequences of this extended burst of activity. The authors argue that the broadening of government responsibilities into new policy areas such as health care, civil rights, and gender issues and the increasing depth of existing government programs explain many of the changes in American politics since the 1970s.

Good Enough for Government Work
The Public Reputation Crisis in America (And What We Can Do to Fix It)
Amy E. Lerman
With Good Enough for Government Work, Lerman argues persuasively that the reputation of government is itself an impediment to government’s ability to achieve the common good. In addition to improving its efficiency and effectiveness, government therefore has an equally critical task: countering the belief that the public sector is mired in incompetence. Lerman shows how negative perceptions are highly resistant to change and how citizens’ beliefs about government can quickly become a self-fulfilling prophecy. The book concludes with practical solutions for how the government might improve its reputation and roll back current efforts to eliminate or privatize public services.

Chicago Studies in American Politics
Democracy and Dysfunction
Sanford Levinson and Jack M. Balkin
This book brings together two of the leading constitutional law scholars of our time in an urgently needed conversation that seeks to uncover the underlying causes of our current crisis and their meaning for American democracy. In a series of letters exchanged over a period of two years, Levinson and Balkin travel through the convulsions of the 2016 election and Trump’s first year in office. This book will help readers understand how America reached its current situation and how we might forestall the next demagogue who will seek to beguile the American public.

The Increasingly United States
How and Why American Political Behavior Nationalized

Learning One’s Native Tongue
Citizenship, Contestation, and Conflict in America
Tracy B. Strong

Strong explores the development of the concept of American citizenship and what it means to belong to this country, starting with the Puritans in the seventeenth century and continuing to the present day. He examines the conflicts over the meaning of citizenship in the writings and speeches of prominent thinkers and leaders and analyzes the ensuing changes in the conception of citizenship, paying attention to what difference each change makes and what each particular conception entails socially and politically.

The essays are well written and engaging, new and enlightening.”—Peter James Hudson, University of California, Los Angeles

Citizen Brown
Race, Democracy, and Inequality in the St. Louis Suburbs
Colin Gordon
“Citizen Brown arrives at a propitious moment, when many Americans are still trying to make sense of how and why one of the most explosive incidents in American race relations—the 2014 killing of Michael Brown in Ferguson, Missouri—occurred not in a center city, where so many of the nation’s best-known racial dramas have played out over the last fifty years, but in a suburb. What Gordon accomplishes here is a much needed, much deeper understanding of what happened there, even when Ferguson isn’t front and center. Citizen Brown is a pioneering foray into a larger, more complicated consideration of the recent history of race relations in American suburbs.”—Mark Krasovic, author of The Newark Frontier

The Future of Black Politics
Michael C. Dawson

The Articles of Confederation and the Road to the Constitution
George William Van Cleve

“Instead of asking how the Constitution came to be adopted, Van Cleve asks why the previous government, the Articles of Confederation, failed—and why it failed not only in our own modern eyes, but in the eyes of its contemporaries. Pairing an enormous amount of scrupulous research with the unique perspective of a legal scholar, Van Cleve bridges the divide between scholarship and the curious reader. Dangerous Counsel
Accountability and Advice in Ancient Greece
Matthew Landauer

With Dangerous Counsel, Matthew Landauer analyzes the sometimes ferocious and unpredictable politics of accountability in ancient Greece and offers novel readings of ancient history, philosophy, rhetoric, and drama. In comparing the demos to a tyrant, thinkers such as Herodotus and Plato were attempting to work out a theory of the badness of unaccountable power; to understand the basic logic of accountability; and to explore the ways in which political discourse is profoundly shaped by institutions and power relationships. In the process they created strikingly portable theories of counsel and accountability that traveled across political regime types and remain relevant to our contemporary political dilemmas.

Leo Strauss on Hegel
Leo Strauss on Hegel reconstructs Strauss's 1965 seminar on Hegel at the University of Chicago, supplemented by passages from an earlier version of the seminar. Strauss focused his seminar on the lectures collected in The Philosophy of History, which he considered more accessible than Hegel's written works. In his own lectures on Hegel, Strauss continues his project of demonstrating how modern philosophers related to ancient thought and explores the development and weaknesses of modern political theory. In addition to a relatively complete transcript, Leo Strauss on Hegel also includes annotations that bring context and clarity to the text.

* And Why We Don’t Pay to Ride Elevators  
Edited by Jason Prince and Judith Delheim

“For those seeking to secure more sustainable, equitable and sane cities, this exceptional collection should be cause for celebration. In ways that are profoundly convincing, *Free Public Transit* suggests that the ostensibly radical and utopian demand for fare-free transit is hardly radical or utopian at all.”—Kafui Attoh, Joseph S. Nightmarch
Among India's Revolutionary Guerrillas
Alpa Shah
“An exceptional undertaking. Nightmarch provides one of the most nuanced, informed accounts yet of this strange and awful conflict. . . . A considered, sympathetic, and balanced analysis—[it] is one of the few accounts we possess that gives [the tribal communities and the Naxalites] a voice.”—Guardian

Myanmar’s Enemy Within
Buddhist Violence and the Making of a Muslim Other
Francis Wade
Praise for the previous edition
“Bold and brave. . . . Wade’s book tells the personal stories of Muslim and Buddhist characters who have animated the tragic scenes of Myanmar’s deadly morality play.”—Time

“The roots of ethnic and religious conflict in Myanmar, especially in relation to anti-Muslim hatred, stretch back further than is often acknowledged. By training his analysis on relatable perspective via rich reporting, Wade seeks to trace the lineage of violence, for which some of Myanmar’s present-day leading lights and even venerated monks are culpable, in an investigation that’s at once illuminating and sobering.”—Los Angeles Review of Books

Black Wave
How Networks and Governance Shaped Japan’s 3/11 Disasters
Daniel P. Aldrich
“Three disasters—an earthquake, a tsunami, and a nuclear meltdown—struck Japan on 3/11, generating one of the greatest catastrophes in recent history. In Black Wave, Aldrich asks a series of essential questions: How did so many people survive? Why did some places fare so much better than others? What does it mean to be resilient in a world of emerging risks? His findings are surprising and important. Everyone interested in disaster—or, really, survival—should read this excellent book.”—Eric Klinenberg, New York University

The Gateway to the Pacific
Japanese Americans and the Remaking of San Francisco
Meredith Oda
Focusing on the development of the Japanese Cultural and Trade Center in San Francisco, Meredith Oda shows how this multilayered story was embedded within a larger story of the changing institutions and ideas that were shaping the city and its identity as the “Gateway to the Pacific.” During the formative decades following World War II, Oda argues, San Francisco’s relations with and ideas about Japan were being forged within intimate sites of civic and community life. San Francisco’s story is an inherently local one, but it also a broader story of a city collectively reimagining its place in a global economy.

Authoritarian Apprehensions
Ideology, Judgment, and Mourning in Syria
Lisa Wedeen

“Through close reading of an astonishingly broad array of cultural materials, Authoritarian Apprehensions captures the transition from Syria’s neoliberal autocracy to civil war authoritarianism while eloquently conveying both the grief and resilience of her ethnographic subjects. This wonderfully written book complicates the conventional political science account of authoritarian resilience and provides a compelling contribution to the growing literature theorizing authoritarianism.” — Asli Bali, University of California, Los Angeles

“Subtle and immensely insightful, Authoritarian Apprehensions is an enlightening study into questions of cultural production in the context of power, brutality, and obedience to rule.” — Laleh Khalili, SOAS University of London

Kill It to Save It
An Autopsy of Capitalism’s Triumph over Democracy
Corey Dolgon

“A trenchant critique of a popular notion in today’s politics and policy making: kill it to save it, the notion that often ‘the only way to save public institutions is to privatize them.’ . . . Kill It to Save It is engagingly written and persuades the reader of the need to save our public institutions by investing in them, not by killing them. Recommended.” — Choice

Populism and the Press in Venezuela

“Deadline is a gripping study of the media practices that shape and mold the protean effects of populism. The focus is Venezuela, a petrostate that fervently crystallized global neoliberal discontent in the theatrics of chavismo even as the populist movement became wreathed in increasing violence and social instability. Samet provides an engaging, insightful analysis of this situation.”—Dominic Boyer, Rice University

The Federal Impeachment Process
A Constitutional and Historical Analysis
Michael J. Gerhardt

For more than twenty years, The Federal Impeachment Process has served as the most complete analysis of the constitutional and legal issues raised in every impeachment proceeding in American history. Impeachment, Michael J. Gerhardt shows, is an inherently political process designed to expose and remedy political crimes. For this third edition, Gerhardt updates the book to cover cases since President Clinton. He discusses the issues arising from the possible impeachment of Donald Trump, including whether a sitting president may be investigated, prosecuted, and convicted for criminal misconduct.

The Search for Justice
Lawyers in the Civil Rights Revolution, 1950–1975
Peter Charles Hoffer

With rich, copiously researched detail, Hoffer takes readers through the interactions of different groups of lawyers during the civil rights era, focusing on one of the central issues of the time: school segregation. Hoffer sets these lawyers’ activities not only in the context of the civil rights movement but also of their full political and legal legacies. Seeing the civil rights era through the lens of law enables us to understand for the first time the many ways in which lawyers affected the course and outcome of the movement.

Speaking for the Dying
Life-and-Death Decisions in Intensive Care
Susan P. Shapiro

Seven in ten Americans over the age of sixty who require medical decisions in the final days of their life lack the capacity to make them. For many of us, our biggest, life-and-death decisions—literally—will therefore be made by someone else. Speaking for the Dying draws on daily observations over more than two years in two intensive care units in a diverse urban hospital. This book shines a bright light on a role few of us will escape and offers steps that patients and loved ones, health care providers, lawyers, and policymakers could undertake before it is too late.

“In this remarkable book of personal and communal atonement, Dew honors what he calls ‘the intellectual aikido’ of Aliite thinkers across a hundred years of insistent devotion to the ideals of American citizenship. Placing the Aliites in the proud company of American freethinkers, Dew lays before us an alternative tradition of American democracy—of civic engagement as religion—from the founding of utopian communities to the courting of FBI surveillance. Radical Enfranchisement in the Jury Room and Public Life
Sonali Chakravarti
With Radical Enfranchisement in the Jury Room and Public Life, Sonali Chakravarti offers a full-throated defense of juries as a democratic institution. She argues that juries provide an important site for democratic action by citizens and that their use should be revived. Being a juror, Chakravarti argues, can guide citizens in how to be thoughtful rule-breakers by changing their relationship to their own perceptions and biases and by making options for collective action salient, but they must be better prepared and instructed along the way.

Oliver Wendell Holmes Jr. and Legal Logic
Frederic R. Kellogg
With Oliver Wendell Holmes, Jr. and Legal Logic, Frederic R. Kellogg examines the early diaries, reading, and writings of Justice Oliver Wendell Holmes, Jr. (1841–1935) to assess his contribution to both legal logic and general logical theory. Through discussions with his mentor Chauncey Wright and others, Holmes derived his theory from Francis Bacon’s empiricism, influenced by recent English debates over logic and scientific method, and Holmes’s critical response to John Stuart Mill’s 1843 A System of Logic.

Liberal Suppression
Section 501(c)(3) and the Taxation of Speech
Philip Hamburger
“While there are many books about the role of religion and politics and a large literature on the constitutional implications of tax exemptions and the regulation of nonprofits, none bring these topics together like Hamburger’s sophisticated, original, and compelling arguments. Hamburger persuasively argues that this seemingly modest provision in the tax code actually has important implications for constitutional law, religious freedom, and the development of American liberalism.”—Ilya Somin, author of The Grasping Hand: “Kelo v. Prohibition, the Constitution, and States’ Rights
Sean Beienburg
In this book, Sean Beienburg recovers a largely forgotten constitutional debate, revealing how Prohibition became a battlefield on which skirmishes of American political development, including the debate over federalism and states’ rights, were fought. The most comprehensive treatment of the constitutional debate over Prohibition to date, the book concludes with a discussion of the parallels and differences between Prohibition in the 1920s and debates about the legalization of marijuana today.
“Anyone who wants to understand the complicated constitutional politics of Prohibition will want to read this detailed, state-by-state account.”—Ken I. Kersch, Boston College

The Conservative Case for Class Actions
Brian T. Fitzpatrick
Since the 1960s, the class action lawsuit has been a powerful tool for holding businesses accountable. Yet years of attacks by corporate America and unfavorable rulings by the Supreme Court have left its future uncertain. In this book, Brian T. *Is the Law Keeping Up?*

**Edited by Steven Davidoff Solomon and Randall Stuart Thomas**

Steven Davidoff Solomon and Randall Stuart Thomas bring together leading corporate law scholars, judges, and lawyers from top corporate law firms to explore what needs to change and what has prevented reform thus far. Slices and Lumps
*Division and Aggregation in Law and Life*

**Lee Anne Fennell**

Lee Anne Fennell explores how two types of configuration challenges—carving out useful slices and assembling useful lumps—surface in myriad contexts. With a technology-fueled entrepreneurial explosion underway that is dividing goods, services, and jobs in novel ways, and as urbanization and environmental threats raise the stakes for assembling resources and cooperation, this is a crucial time to confront questions of slicing and lumping. This book reveals configuration’s power and potential—as a unifying concept and as a focus of public and private innovation.

Antitrust Law, Second Edition
Richard A. Posner

When it was first published a quarter of a century ago, Richard Posner’s exposition and defense of an economic approach to antitrust law was a jeremiad against the intellectual disarray that then characterized the field. As other perspectives on antitrust law have fallen away, Posner’s book has played a major role in transforming the field of antitrust law into a body of economically rational principles largely in accord with the ideas he set forth.

Thinking Through Statistics
John Levi Martin

“Highly recommended . . . A fundamental commandment in statistics is ‘Researcher, know thy data.’ Martin takes this commandment seriously. In a set of nine information-rich chapters, he develops a persuasive argument that sociologists have relied too often on statisticians for guidance on how to develop and test empirical models.” —Choice
