PHILOSOPHY

Serious Larks
The Philosophy of Ted Cohen
Edited and with an Introduction by Daniel Herwitz
“It is a very rare pleasure to read Cohen’s essays. He was a true original who always took a fresh approach to a topic, and these essays are gems, bringing together in one place the distinctive combination that is Cohen: the sharpest philosophical acuity, a wonderful writing style—lucid, invariably clear, rich in implication (and thus they make one think), a sense of adventure and discovery (often about things one took for granted), and—perhaps most distinctively Cohenesque, a sense of companionship and humane presence.”—Garry L. Hagberg, Bard College
2018 240 p. 6 x 9

Irrevocable
A Philosophy of Mortality
Alphonso Lingis
“In this rich and unique philosophical narrative, Alphonso Lingis recounts spiritual journeys from Incan Peru to the streets of Paris and Africa to Cambodia’s Truth and Reconciliation Trials. In conversation with Heidegger, he offers meditations on death, with Foucault on madness, with Nietzsche on extreme joy, and through phenomenology his thoughts on the paradoxes of time. Autobiographical vignettes and the author’s photographs serve as testimony to a profoundly philosophical life.”—Cynthia Willett, Emory University

Seven Ways of Looking at Pointless Suffering
What Philosophy Can Tell Us about the Hardest Mystery of All
Scott Samuelson
“Excellent. . . . The challenge that Samuelson locates in the philosophical tradition, and which he passes on to the reader, is to reflect deeply on what it means to live with pointless suffering while resisting the temptation to transmute it into meaningful pain, which is something else entirely. . . . Another great merit of Samuelson’s insightful, informative and deeply humane book is that it is a genuine pleasure to read.”—Times Higher Education, Book of the Week

The Aesthetics of Meaning and Thought
The Bodily Roots of Philosophy, Science, Morality, and Art
Mark Johnson
“The Aesthetics of Meaning and Thought eloquently argues that all meaningful experience is aesthetic experience. Johnson advances this idea through discussion of both classic philosophical ideas on pragmatism and contemporary research from cognitive linguistics and cognitive science. By blending together these different scholarly traditions, Johnson offers a grand vision of the essential interaction of embodied minds, meanings, and aesthetics.”—Raymond W. Gibbs Jr., University of California, Santa Cruz

Embodied Mind, Meaning, and Reason
How Our Bodies Give Rise to Understanding

A Decent Life
Morality for the Rest of Us
Todd May
In A Decent Life, May leads readers through the traditional philosophical bases of a number of arguments about what ethics asks of us, then he develops a more reasonable and achievable way of thinking about them, one that shows us how we can use philosophical insights to participate in the complicated world around us. He explores how we should approach the many relationships in our lives—with friends, family, animals, people in need—through the use of a more forgiving, if no less fundamentally serious, moral compass.

The Seminars of Jacques Derrida

Theory and Practice
Edited by Geoffrey Bennington and Peggy Kamuf
Translated by David Wills
In Theory and Practice, Derrida reexamines the theory-practice dichotomy through a series of provocative readings. Engaging primarily with Marx and Heidegger, as well as his contemporary Louis Althusser, Derrida examines the roles of thinking and doing in political and philosophical life.

The Death Penalty, Volume II
Translated by Elizabeth Rottenberg
Of central importance in this second volume of Derrida's extraordinary analysis of the death penalty, is Kant's explicit justification of the death penalty in the Metaphysics of Morals. Thoroughly deconstructing Kant's position, Derrida exposes numerous damning contradictions and exceptions. Derrida's powerful analysis will prove to be a paramount contribution to the death penalty debate as well as a lasting entry in his celebrated oeuvre.

What Philosophy Is For
Michael Hampe
Translated by Michael Winkler

“Hampe offers a learned reflection on the forms philosophy has taken, providing guideposts for the future development of the field. In ways reminiscent of Hadot and Dewey, he reanimates the Socratic project of treating philosophy as an activity rather than simply a doctrine, arguing that philosophy needs a renewed commitment to non-doctrinal, agnostic thinking for an era where technoscience is creating new forms of life.” —Robert Frodeman, University of North Texas

The Actual and the Rational
Hegel and Objective Spirit
Jean-François Kervégan
Translated by Daniela Ginsburg and Martin Shuster

“Jean-François Kervégan’s The Actual and the Rational is hard to praise highly enough. It takes on both Hegel’s practical philosophy in the broadest sense as theory of action and practical reasoning and the stickier issues of historical and textual interpretation that surround Hegel’s work. Even for a Hegel scholar steeped in those texts and the secondary literature surrounding them, Kervégan’s treatment is refreshing and new.”—Terry Pinkard, Georgetown University

Logic as Metaphysics in The Science of Logic
Robert B. Pippin

“In this fascinating reading of Hegel’s The Science of Logic, Robert Pippin gives us much to ponder—not least how it might be possible to see Hegel’s position as a fusion of Kantian idealism and Aristotelian metaphysics. Literary Studies after Wittgenstein, Austin, and Cavell

The Government of Desire
A Genealogy of the Liberal Subject
Miguel de Beistegui

“Miguel de Beistegui contributes to what Foucault called a history of the present by pursuing the idea of desire across three categories: economic, sexual, and symbolic. By interweaving the historical and theoretical aspects of these together, he argues that desire is not a transcendental feature of subjectivity, but rather an ‘assemblage’ of knowledge and power. Bolstered by a remarkable amount of research, The Government of Desire is a compelling, persuasive, and original work of philosophy.”—Leonard Lawlor, Pennsylvania State University

Taste
Giorgio Agamben
Translated by Cooper Francis

Taste, Agamben argues, is a category that has much to reveal to the contemporary world. Taking a step into the history of philosophy and reaching to the very origins of aesthetics, Agamben critically recovers the roots of one of Western culture’s cardinal concepts. Agamben is the rare writer whose ideas and works have a broad appeal across many fields, and with Taste he turns his critical eye to the realm of Western art and aesthetic practice.

Jacques Lacan

The Philosophical Hitchcock

Vertigo and the Anxieties of Unknowingness

Robert B. Pippin

“[Pippin] proposes an interpretation that shows how the film can be said to bear on a philosophical problem. That problem, in Pippin’s words, is concerned with ‘commonsense views about what it is to understand another person or be understood by him or her, and about how we present ourselves to others in our public personae.’ In service of this aim, he offers an impressively close scrutiny of the film, which also considers its formal and technical properties.”—Times Higher Education

Hobbes’s Kingdom of Light
A Study of the Foundations of Modern Political Philosophy
Devin Stauffer
“A brilliant and sustained reflection on Hobbes’s philosophic, theological, and political-philosophic attempt to dispel the ‘Kingdom of Darkness.’ Stauffer clarifies and assesses the arguments that led Hobbes to his extraordinary and highly influential attempt to establish human society on a radically new, ‘enlightened,’ secular basis. This is a vitally important book.”—Timothy Burns, Baylor University

Action versus Contemplation
Why an Ancient Debate Still Matters
Jennifer Summit and Blakey Vermeule
“This is a very subtle and surprising book that nevertheless goes down easy . . . . There’s great generosity of spirit in their writing and thinking, and that generosity will have a salutary effect on all those whose thinking this book will touch. Action versus Contemplation is itself a contemplative document meant to intervene in the world it addresses, to get us to rethink practical matters, and to act in ways that will promote thinking. It urges action as a way of thinking, and thinking as a way of acting, and is a model of what it advocates for.”—William Flesch, Brandeis University

On Descartes’ Passive Thought
The Myth of Cartesian Dualism
Jean-Luc Marion
Translated and with an Introduction by Christina M. Gschwandtner
“This is the first English translation of Marion’s Sur la pensée passive de Descartes (2013), which is the culmination of his scholarship on Rene Descartes. In it, Marion develops a radical reinterpretation of Cartesian metaphysics. He argues that in the Meditations on First Philosophy, Descartes quietly distinguishes between extended bodies as understood rationally and quantitatively and the ‘my body’ of immediate sensation . . . . Highly recommended.”—Choice

Montesquieu and the Despotic Ideas of Europe
An Interpretation of The Spirit of the Laws
Vickie B. Sullivan
“Searching for the mysterious ‘chain’ in a notoriously difficult book—The Spirit of the Laws—Sullivan focuses on the idea of despoticism that plays a key role in Montesquieu’s conceptual framework. By drawing on a wide range of authors and texts, her erudite analysis sheds fresh light on Montesquieu’s treatment of despoticism in Europe and his views on arbitrary power.”—Aurelian Craiutu, Indiana University, Bloomington

Spinoza and the Cunning of Imagination
Eugene Garver
“Spinoza and the Cunning of Imagination offers a compelling, thought provoking, and original argument that challenges readers of Spinoza to reexamine many of their well-received tropes and habits. Garver shows himself to be a real connoisseur of Spinoza’s philosophy, and the breadth of his reading and his knowledge of the secondary literature is remarkable. . . . His book constitutes . . . a rather audacious attempt to come to terms with the Spinozistic philosophical enterprise as such and from a critical but sympathetic view of what is undeniably one of the most important philosophical systems of the Western philosophical tradition.”—Elhanan Yakira, Hebrew University of Jerusalem

Any reader interested in (re)discovering Spinoza should start with Christopher Skeaff’s erudite yet supple Becoming Political, a book that not only offers a fresh interpretation of Spinoza as a ‘vital republican’ but also mobilizes that reading to engage rigorously and meaningfully with a variety of strands of contemporary political theory.”—Samuel A. **The Myth of Disenchantment**
*Magic, Modernity, and the Birth of the Human Sciences*
Jason Ā. Josephson-Storm

“The author displays impressive erudition in tackling what is, by any standards, a massive undertaking. . . . Josephson-Storm exhaustively traces the development of Western thought on this subject through history to the present time, and convincingly argues that the magic never really went away after all. . . . While the underlying theme is eminently simple and understandable, some of the philosophical arguments become immensely complex.” — *Magonia Review of Books*

**Sovereignty and the Sacred**
*Secularism and the Political Economy of Religion*

“Tremendous. With an incredible depth and range of scholarship, *Sovereignty and the Sacred* makes a strong case for the continuing importance of the field of the history of religions and the comparative study of religion, and it makes a crucial intervention in theorizing religion. Yelle’s argument is rich, important, and deeply erudite. And it is just really interesting.” — Tyler Roberts, author of *Encountering Religion: Responsibility and Criticism After Secularism*

**Secret Body**
*Erotic and Esoteric Currents in the History of Religions*
Jeffrey J. Kripal

“Kripal presents us with a compilation of theories, cultural references and anecdotes making up an impassioned thesis about the future of religious studies and ‘what human beings may become’. . . . For all its eccentricities, Kripal’s work is playful, engaging and original. His references to both ‘high’ and ‘low’ culture are reminiscent of prominent intellectuals such as Susan Sontag and Slavoj Žižek. His earnest encouragement of scholars to be more open and his rejection of sceptical approaches—‘scholars are not religiously inept and disciples are not dumb’—is both heartening and timely.” — *Times Higher Education*

Philosophy, Writing, and the Character of Thought
John T. Lysaker
“This book is a profound meditation on what it means to write philosophy in all the remarkable diversity of ways in which this has happened. Examples abound from a rich tapestry composed of figures from Plato through Emerson and Thoreau, into Heidegger, Cavell, Nietzsche, and Wittgenstein. Lysaker’s own text defies all standard genres—it is itself sui generis—as it creates its own original unique mixture of reflection and critique. . . . Lysaker shows that philosophy at its best is an experimentation and a provocation; and his own text, at once learned and wry, humorous and dead serious, eloquent and forceful, is both of these at once.”—Edward S. Casey, State University of New York at Stony Brook

Improvising Improvisation

A resoundingly masterful accomplishment in every sense.”—John T. Hamilton, Harvard University

New Television
The Aesthetics and Politics of a Genre
Martin Shuster
“Martin Shuster has written an astonishing book on television’s recent artistic and philosophical achievements. . . . Aesthetics at Large
Volume 1: Art, Ethics, Politics
Thierry de Duve
“Aesthetics at Large is a contemporary rereading of Kant’s third Critique. . . . De Duve intends his ‘critique’ of art and aesthetic appreciation to issue in a recovery of a Kantian moral and political thesis apt for our own disturbing time. His proposal is too strong to be ignored: its importance lies in the recovery of the holism of cultural concerns, in a reasoned refusal to treat the aesthetic and the political as easily separated issues, in his novel vindication of the full power of Kant’s thesis for our time.”—Joseph Margolis, Temple University

Creatively Undecided
Toward a History and Philosophy of Scientific Agency
Menachem Fisch
“This volume raises essential epistemological questions in a text poised to make a lasting contribution to the scholarly community. Fisch develops the opposing insights of philosophers Karl Popper and Thomas Kuhn. Fisch probes the question of how scientific theories change to develop a more complete theory of science as a rational endeavor. Ultimately, Fisch follows more in the footsteps of Kuhn, grounding his analysis on the understanding that in philosophy, questioning is the piety of thought. . . . Overall, this is a remarkable book on critical thinking and the philosophy and history of science. Highly recommended.”—Choice

The Moral Meaning of Nature
Nietzsche’s Darwinian Religion and Its Critics
Peter J. Woodford
“In The Moral Meaning of Nature, Peter Woodford raises the question of the impact of naturalistic approaches to life on conceptions of value, science, and religion in the late nineteenth century, taking Friedrich Nietzsche as his point of departure. Woodford does an excellent job of showing how the concept of ‘life’ connects many strands of Nietzsche’s thought while also engaging a constellation of authors and their approaches, such as Overbeck and the study of religion, Simmel and the study of sociology, and Rickert and the neo-Kantian approach to values.”—John H.
